Projects

FindFlix Website | *Full Stack Developer and Project Manager* | <https://jrubin9326.github.io/findFlix/>

FindFlix is a website that allows users to search for the current most popular movies filtered by genre.

- Uses APIs to pull in movie information allowing users to read information about the movie and watch the trailer.
- **Languages Used:** HTML, CSS, JavaScript, APIs, Axios, AJAX

Google Book Search Application | *Full Stack Developer* | <https://afternoon-mesa-98465.herokuapp.com/>

A React-based Google Books Search that displays books based on user searches.

- Uses APIs to pull in book information from Google Books. Allows the user to view or save a result.
- **Languages Used:** HTML, CSS, JavaScript, APIs, React, MongoDB, Node.js

Harry Potter Memory Game | *Full Stack Developer* | <https://rachelemoose.github.io/Harry-Potter-Memory-Game/>

A React-based memory game where a user must remember objects that they've clicked to win the game.

- Uses Reach to shuffle images that are randomized and reshuffled with each click. Score is tracked for wins and losses.
- **Languages Used:** HTML, CSS, ES6, React, Bootstrap
